## **Subject | Technical Report of the event NETWORKING FOR DATA SCIENCE MATHS AND ENGINEERING of COST Action TD1409 “Mathematics for industry network (MI-NET)”**

The event took place the 15<sup>th</sup> May, at Instituto Superior Técnico, organized by Cláudia Nunes Philippart (Math Department of IST), M. Rosário Oliveira (Math Department of IST), Conceição Amado (Math Department of IST) and Cláudia Soares (Institute of Systems and Robotics/IST).

Besides the kind support of MI-NET, we had also the support of the Math department of IST, CEMAT and ISR (research centers from IST).

We had 7 invited speakers, covering several areas of industry:

Ana Teresa Freitas, HeartGenetics

Pedro Batista, Deloitte

Bárbara Simões, A.T.Kearney

Mariana Almeida, Feedzai

Kuno Juisman, ASML

John Mozley, BNP-Paribas

Sabina Zejnilovic, NOS

Each speaker presented his/her company, showing the connection between mathematics, engineering and data science. There was great interest in the presentations, and after each one of them there was time for questions. The coffee and lunch breaks were also important for networking between people.

Besides the presentations of these speakers, we ended the event with a debate, with the following panel:

Manuel Cruz, PT-MATHS-IN

Kuno Huisman, ASML

João Paulo Costeira, IST/ISR

João Cruz, DSPA

Mariana Filipe, student from IST and representing NMATH

Rita Lau Gomes, Biogen

Moderator: Cláudia Nunes Philippart

We had more than 110 participants, not only from IST (mostly master and PhD students), but also a significant number of participants from industry.

The event was announced in several ways, namely by mailing lists, social networks and in the home page of IST. The webpage can be find in: <http://networking4ds.isr.tecnico.ulisboa.pt>

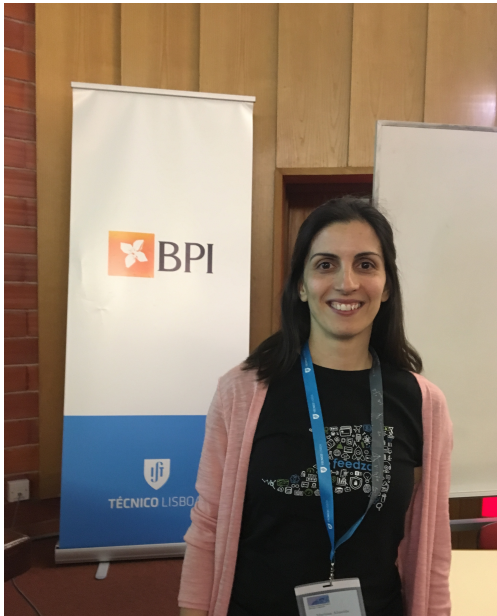

In the annex we present a list of the participants and their affiliation.

We leave also here some pictures of the event.

## LIST OF ANNEXES

- 1) Program
- 2) Attendance list
